

CERTIFICATE PENETRATION TEST

SySS GmbH
Schaffhausenstraße 77
72072 Tübingen

hereby confirms that it carried out a penetration test for the company

AceBIT GmbH
Holzhofallee 15
64295 Darmstadt

Test item: Password Depot 19.0.0

Test period: December 1 to 23, 2025

Simulated attack scenarios:

- Cryptographic attacks
- Rogue client attacks
- Rogue server attacks
- Machine-in-the-middle attacks
- Input validation attacks

Test depth / resistance period: The simulated attack lasted ten person-days.

Summary of test results: SySS GmbH hereby confirms that the test item resisted all attack activities throughout the above-mentioned test period and with the scheduled test depth. No major security flaws were detected.

Recommendation: SySS recommends that the test item be retested after every significant change or at the latest after one year.
